Objective

Full-stack web developer skilled in **React.js**, **Node.js**, and **Express.js** with hands-on experience building and deploying production-grade applications. Seeking a **Web Developer** role to contribute to scalable, user-focused products by leveraging strong fundamentals in JavaScript, REST APIs, and database design.

Technical Skills

Languages: C++, Python, Java

Frontend: HTML, CSS, TailwindCSS, JavaScript, React.js

Backend: Firebase, Node.js, Express.js, REST APIs, Postman, JWT

Databases: MySQL, MongoDB

Cloud and Deployment Platforms: Docker, Render, Netlify

Core Concepts: OOP, Operating Systems, DBMS, Computer Networks

Education

Ajay Kumar Garg Engineering College

May 2026

Bachelor of Technology in Information Technology

St. Xavier's Sr. Sec. School

2021

Class 12th

Percentage: 86

Experience

YNV Solutions

Jan 2026 – June 2026

Software Development Engineer

Remote

- Built **SwiftCause**, a **multi-tenant donation platform** for UK nonprofits using **Next.js**, **React**, **TypeScript**, and **Feature-Sliced Design**, with **Stripe Connect** powering one-time/recurring donations and direct charity payouts.
- Implemented **transactional email infrastructure with Brevo** for donation receipts, contact confirmations, and organisation onboarding, adding deduplication, audit-logged delivery tracking, and race-safe handling of Firestore eventual consistency.
- Engineered **Gift Aid and GASDS compliance flows** end-to-end, building a donation claim-state machine, **HMRC-compliant CSV/ODS export pipeline**, 10:1 allowance-cap batch allocation, and daily cron sweeps enforcing declaration-window and 2-year claim deadlines.
- Designed **role-based user management** with a **5-tier permission hierarchy** (super_admin, admin, manager, operator, viewer), enforcing organisation-scoped access control so admins manage only users within their own tenant while super_admins retain cross-org and elevated-role privileges.

Projects

Ink & Think - Real-Time Multiplayer Drawing Game | *React, Node.js, Express.js, Socket.io*

[\(View Project\)](#)

- Built a real-time multiplayer drawing and guessing game supporting **10+ concurrent players** per room with **50ms latency** for instantaneous updates.
- Engineered a high-performance **real-time synchronization engine** using WebSockets (Socket.io), achieving **98% message delivery reliability** for drawings and guesses.
- Integrated features including word pack customisation, **in-game chat**, **leaderboard**, and an optimised canvas interface, backed by a diversified library of **500+ words**.

Achievements

Gold Medalist – Inter-State Athletics Championship (2023): Secured **1st place** in both **100m** and **200m sprint** events among **450+ participants** representing multiple states.

Winner – Best Startup Idea Award (2024): Awarded **1st prize** for an innovative technology-driven solution at the **Innovation & Entrepreneurship Summit**, hosted by **Thapar University, Patiala**, competing among **120+ startup teams**.
